Adjustable digital thermostat, 0°C to 8°C

**Safety regulations require careful preparation, handling and storage of food products at all times. Cold plate units operate with a single refrigeration coil attached to the underside of the tank, thus food is chilled from underneath. In contrast, Cross Fin coil units have an additional refrigeration coil located above the level of the pans that helps cool that space as well. For this reason, Roband highly recommends the consideration of Cross Fin unit for all situations. Unless users are absolutely certain that a single refrigeration coil will suit the purpose and are in compliance with food safety standards, Cross Fin coil units are recommended at all times.*

SPECIFICATIONS

MODEL	NO. OF PANS	POWER Watts [^]	CURRENT Amps	DIMENSIONS w x d x h (mm)
